Spay Kit

Essential Surgical Instruments for Safe & Effective Sterilization

High-quality, durable and reliable instruments for canine and feline spay (ovariohysterectomy) procedures.

1 Scalpel Handle

Use: Holds the scalpel blade for skin incision.

Scalpel Blades (No. 10 / 11 / 15)

Use: For precise skin and soft tissue cutting.

2 Surgical Scissors (Straight & Curved)

Use: For cutting tissue, sutures and soft tissue dissection.

3 Mosquito Forceps (Straight & Curved)

Use: For clamping small blood vessels and tissue.

4 Kelly Forceps (Hemostatic)

Use: For clamping larger vessels and bleeding control.

5 Tissue Forceps (Adson & Standard)

Use: For grasping and handling tissue.

6 Needle Holder (Mayo-Hegar)

Use: For holding suture needles during suturing.

7 Towel Clamps (Backhaus)

Use: To secure surgical drapes and towels.

8 Spay Hook (Snook Hook)

Use: To exteriorize and isolate the reproductive tract.

9 Allis Tissue Forceps

Use: For grasping tough tissue and fascia.
